

BRIAN BULTUT CHEPYEGON

Cloud | ML Engineer

bultutyegonn@gmail.com | +254798134566 | Nairobi , Kenya

PROFESSIONAL SUMMARY

Results-driven Computer Science graduate with strong experience in backend development, cloud computing, automation, data processing, and AI-related projects. Skilled in Python, Django, REST APIs, AWS, Terraform, Linux administration, databases, and system troubleshooting. Demonstrated ability to build scalable applications, automate workflows, optimize database performance, and collaborate effectively in technical teams. AWS Certified Cloud Practitioner with leadership experience in Data Science and Artificial Intelligence initiatives.

WORK EXPERIENCE

Backend developer

Feb 2025– June 2025

NanoComputing Limited

- Developed and maintained scalable backend systems using Django and PostgreSQL, improving API response performance by 25%.
- Containerized applications using Docker, enabling consistent deployment across environments and reducing deployment issues by 30%.
- Implemented CI/CD pipelines using GitHub Actions, automating testing and deployment workflows and reducing release time.
- Collaborated with frontend and product teams to design and optimize database schemas for improved system efficiency.

Secretary & Machine Learning Member Lead

Jan 2025 – Dec 2025

Data Science and AI club (DSAIC)

- Managed member onboarding, registration, and club records, improving organizational efficiency and data accuracy by 20%.
- Coordinated and tracked club projects, increasing project completion rate by 35% through structured follow-ups and accountability systems.
- Facilitated hands-on machine learning study sessions, supporting members in model development and debugging, improving project success.
- Boosted active member participation and club enrollment by 40% through improved engagement, communication, and structured activities.

PROJECTS

FastAPI Recommendation Service

- Delivered an AI recommendation engine with containerized model inference, achieving 50ms average response latency and improving content relevance by 45%.

Dataset bulk import system

- Engineered an enterprise bulk dataset processing pipeline with async validation and duplicate detection, reducing manual HR data entry by 30% and cutting import processing time by 40%.

EDUCATION

Bachelor of Science in Computer science

- Dedan Kimathi University of Technology
- Second class upper division

Sep 2022 – June 2026

High School education

- Kabarnet High School
- Final grade: A-

Jan 2018 – April 2022

SKILLS

- Python, Django
- Cloud computing, Aws(EC2,Vpc,IAM,S3)
- Linux
- Automation and scripting, Git , Docker,Terraform
- MySQL, PostgreSQL
- Team leadership, problem solving
