

BRIAN BULTUT CHEPYEGON

Backend Developer | Data Engineer

Nairobi, Kenya (Open to Remote Opportunities)

Email: bultutyegonn@gmail.com | Phone: +254798134566

PROFESSIONAL SUMMARY

Backend and Data Engineer with strong experience in Python, Django, REST API development, ETL pipeline engineering, and PostgreSQL database optimization. Proven ability to build scalable backend systems, process and transform large datasets (100,000+ records), and deploy containerized applications using Docker and CI/CD pipelines. AWS Certified Cloud Practitioner with solid foundations in algorithms, system design, and cloud infrastructure. Passionate about building reliable data-driven systems and high-performance backend services.

TECHNICAL SKILLS

Programming Languages: Python , SQL

Backend Development: Django, Django REST Framework, REST API Design

Data Engineering: ETL Pipelines, Data Cleaning, Data Normalization, Batch Processing

Databases: PostgreSQL (Indexing, Query Optimization, Schema Design), MySQL

DevOps & Tools: Docker, Git, GitHub Actions, Jenkins, Linux

Cloud Platforms: AWS (Cloud Practitioner – Lambda, CloudFormation basics)

Computer Science Fundamentals: Data Structures, Algorithms, System Design

WORK EXPERIENCE

Django Developer Intern (Attachee) – Nanocomputing Limited | Jan 2025 – Apr 2025

- Developed backend features for an internal SaaS platform using Django and PostgreSQL.
- Refactored legacy form modules improving maintainability and reducing form processing errors by 30%.
- Containerized services using Docker enabling consistent development and deployment environments.
- Implemented CI/CD pipelines using GitHub Actions reducing manual deployment workload by 40%.
- Optimized PostgreSQL queries improving API response time by approximately 20%.

- Collaborated with engineers using Git workflows including pull requests, code reviews, and issue tracking.

Secretary – Data Science and Artificial Intelligence Club (DSAIC), Dedan Kimathi University |
Dec 2024 – Dec 2025

- Organized weekly AI and Machine Learning learning sessions increasing active member participation by 35%.
- Coordinated AI workshops and hackathons growing club membership by 40% within one academic year.
- Managed registration, communication, and documentation for 100+ active members.
- Led planning and execution of student hackathons increasing event participation by 50%.
- Facilitated collaborative learning in Machine Learning, AI, and Data Science topics.

PROJECT EXPERIENCE

Data Ingestion & CSV Pipeline System

- Designed scalable ingestion pipeline processing 100,000+ rows per upload.
- Reduced structured data errors by 95% using validation and automated cleaning.
- Improved bulk data import efficiency by 60% through optimized batch processing.

AI Recommendation & Data Processing Engine

- Developed backend service generating 10,000+ recommendations daily.
- Optimized database queries improving recommendation retrieval speed by 40%.
- Improved data model accuracy by 30% through improved preprocessing logic.

Large-Scale Data Cleaning Automation

- Processed and normalized 100,000+ real-world dataset records.
- Built Python automation scripts reducing manual data processing time by 60%.
- Implemented structured pipelines for transformation and validation.

Loan Tracking Data Management System

- Designed normalized PostgreSQL schema managing 5,000+ financial transaction records.
- Implemented indexing strategies improving query performance by 40%.
- Built backend logic for secure storage and retrieval of financial data.

EDUCATION

Bachelor of Science in Computer Science
Dedan Kimathi University of Technology
Expected Graduation: June 2026

CERTIFICATIONS

AWS Certified Cloud Practitioner
