

BRIAN BULTUT CHEPYEGON

AI AUTOMATION | BACKEND | CLOUD ENGINEER

bultutyegonn@gmail.com | +254 798 134 566 | Nairobi, Kenya | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science graduate and AWS Certified Cloud Practitioner with hands-on experience building Python backends, REST APIs, automated data workflows and containerized services. Skilled in Django, FastAPI, PostgreSQL, AWS, Docker, Terraform, Linux and CI/CD, with project experience spanning AI recommendations, semantic search, async bulk processing and agentic automation. Strong in troubleshooting, systems thinking and translating practical business problems into reliable technical solutions.

TECHNICAL SKILLS

Languages: Python, SQL, Bash

Backend & APIs: Django, FastAPI, REST APIs, asynchronous processing, backend system design

AI & Automation: Machine learning, data preprocessing, feature engineering, recommendation systems, semantic search, workflow automation, LangGraph

Cloud / DevOps: AWS (EC2, S3, VPC, IAM), Docker, Terraform, GitHub Actions, Git, Linux

Data: PostgreSQL, MySQL, Redis

EXPERIENCE

Backend Developer Intern (Attaché)

Feb 2025 - June 2025

NanoComputing Limited

- Developed and maintained Django/PostgreSQL backend services, improving API response performance by 25%.
- Containerized applications with Docker, reducing deployment issues by 30% and improving environment consistency.
- Implemented GitHub Actions CI/CD workflows to automate testing and deployment, shortening release cycles.
- Collaborated with frontend and product teams on REST APIs, database schema design, debugging, and performance optimization.

Secretary & Machine Learning Member Lead

Jan 2025 - Dec 2025

Data Science and Artificial Intelligence Club (DSAIC)

- Coordinated projects, study sessions, onboarding, and technical activities; structured follow-ups increased project completion by 35%.
- Supported members with Python, model development, and debugging while helping grow active participation and enrollment by 40%.

SELECTED PROJECTS

MemoryOps - Agentic Organizational Knowledge Recovery | Python, FastAPI, LangGraph, PostgreSQL, Redis, DataHub, Docker

- Developing a multi-agent platform that detects missing metadata, reconstructs context, validates proposed changes, and writes approved knowledge back to DataHub through orchestrated recovery workflows.

CV Bulk Import System | Django, Vue 3, PostgreSQL, Celery, Redis, Docker

- Engineered an asynchronous CSV import workflow with validation and duplicate detection, reducing manual HR data entry by 30% and import processing time by 40%.

FastAPI Recommendation Service | Python, FastAPI, PostgreSQL, Docker

- Built a containerized recommendation API with 50 ms average response latency and a reported 45% improvement in content relevance.

EDUCATION & CERTIFICATION

BSc Computer Science, Second Class Honours (Upper Division) - Dedan Kimathi University of Technology | Sep 2022 - June 2026

AWS Certified Cloud Practitioner
